

TICAB PRINT

INDUSTRIAL PRINTERS TICAB PRINTING SYSTEM TPS

Trade Industrial Company AB is a Polish manufacturer of modern professional equipment trusted by professionals in 51 countries around the world. Our company developed and put into production the Ticab Printing System TPS.

This is an innovative CMYK digital printer for customizing small batches of goods and applying a perfect image at once:
paper (paper bags with and without handles, envelopes, etc.); cardboard (boxes of different heights and shapes, folders, etc.); textile; wood.

Meets the demand for printing individual layouts and small order -1 pc, in a short time in high resolution (1200 DPI) with a print speed of up to 50 items per minute.

Important facts:

- Incredible versatility of this system is achieved through combined use of ultra-fast engine of Hewlett Packard's PAGE WIDE printing technology.
WE ARE OFFICIAL PARTNERS of Hewlett Packard.
- TPS will allow you to print directly in full color C-M-Y-K – on both flat and corrugated boxes (bare and wave coated) and pre-perforated packaging such as cake boxes, pizza boxes, wine boxes, shoe boxes, paper bags with handles and many other products.
- The new wider print area is now 30cm! The height of materials is 30cm (also can be higher according to individual order).
